Together we Lead: Virtual Basecamp

Garret Tracey, Business Development Coordinator

One of the great opportunities I get as the Business Development Coordinator is to attend and help out with the Basecamps run by Communitech for the RCAF! Last week I helped with the "Together we Lead" basecamp, an event that gathered 16 RCAF members to help iterate solutions for implementing a 360 evaluation system into the forces.

Having gone through the basecamp in September I was expecting more or less the same- and boy was I wrong. It's one thing to learn Design Thinking Methodology to take into the workplace, but to see leaders within the forces taking the tools and ideas from Communitech and applying it to a problem in real time was awe inspiring. Especially so, since many people noted that this is not the way the military would normally approach a problem. On Wednesday someone noted how worthwhile it was to "trust the process", which couldn't be more true. The team went from having zero context of Design Thinking Methodology on the Monday, to creating two solutions using Communitechs knowledge on the Friday! I personally can't wait to see how the project evolves in the following weeks after the basecamp.

Jessica's Halloween Favourites:

Do you need a plan for this year's spooky season? Here's my top recommendation!
Halloween Movie: Haunting on Bly Manor
Halloween Candy: Runts and Swedish Berries

Co-op Corner:

Garret Tracey, Business Development Coordinator

Hey there! My name is Garret, this term's business development coordinator. Before this semester I wrapped up my second year as an Arts and Business student at the University of Waterloo. It's a month into the co-op term and I've already picked up lots of new skills and made new friends from all over! In my spare time I play a LOT of Pokemon GO, as well as play disc golf with my family.

What Am I Afraid of?
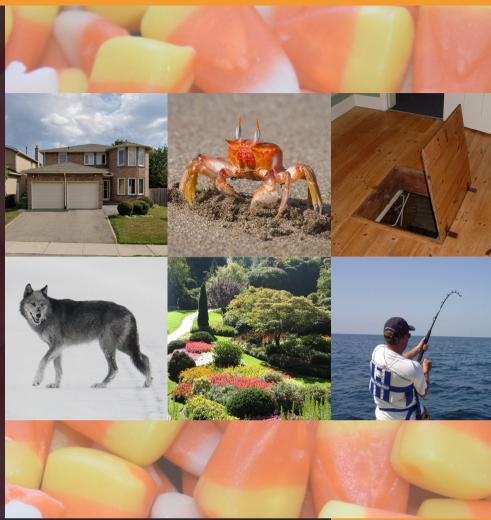

Joshua Oh, Full Stack Developer

EEK! I'm deathly afraid of it, but I'm much too scared to utter its name, let alone look at it!

Maybe these other pictures can help you out?

HINT: Each picture represents a different <u>kind </u>of my fear.
(The answer is at the bottom of the newsletter)

An Update on Maintainer

Arista Mueller, Full Stack Developer

It's been almost 2 months of working on the maintainer project. So far a lot of the work we've been doing has been behind-the-scenes but we're now transitioning towards more visible aspects of the project!

Currently, I'm working on designing the front-end visual for network diagrams, which will show in an easy-to-read format how different milestones of an aircraft inspection depend on one another. It will also show the critical path, highlighting what milestones need to be completed in what sequence in order to complete the inspection efficiently. It's not quite ready to show off yet otherwise I'd attach a picture - you'll just have to wait a bit longer.
